Chemical Physics

Subject index to volume 217

Methods

Theoretical

Classical mechanics

Isotope effects on the rate constants for the processes $O_2 + O \rightarrow O + O_2$ and $O_2 + O + Ar \rightarrow O_3 + Ar$. On a modified ground-state potential energy surface for ozone, A. Gross and G.D. Billing 217 (1997) 1
Phase-space localization and level spacing distributions for a driven rotor with mixed regular/chaotic dynamics, T. Gorin, H.J. Korsch and B. Mirbach 217 (1997) 145
Ultracold atoms in modulated standing light waves, K. Drese and M. Holthaus 217 (1997) 201

Coupling schemes and perturbative treatments

Ultracold atoms in modulated standing light waves, K. Drese and M. Holthaus 217 (1997) 201
Dynamical resonance and tunneling in a driven system with periodic potential, E.M. Zanardi and J.M. Gomez Llorente 217 (1997) 221
Photodissociation of Ar_2^+ in strong laser fields, P. Schwendner, F. Seyl and R. Schinke 217 (1997) 233
Vibronic and vibrational coherence and relaxation dynamics of molecules in condensed phases, M. Hayashi, T.-S. Yang, A. Mebel, C.H. Chang, S.H. Lin and N.F. Scherer 217 (1997) 259
Optimal pump-dump control, Y.J. Yan, J. Che and J.L. Krause 217 (1997) 297

Relativistic quantum mechanics

Spin–orbit interaction in heavy group 13 atoms and TlAr, T. Leininger, A. Berning, A. Nicklass, H. Stoll, H.-J. Werner and H.-J. Flad 217 (1997) 19

Transport quantum mechanics

Dynamical simulation of the driven spin-boson system: The influence of interblip correlations, M. Winterstetter and U. Weiss 217 (1997) 155
Dissipative tunneling with periodic polychromatic driving: Exact results and tractable approximations, M. Grifoni, L. Hartmann and P. Hänggi 217 (1997) 167
Control of tunneling processes with an external field in a four-level system: an analytic approach, R.I. Cukier, C. Denk and M. Morillo 217 (1997) 179
Vibronic and vibrational coherence and relaxation dynamics of molecules in condensed phases, M. Hayashi, T.-S. Yang, A. Mebel, C.H. Chang, S.H. Lin and N.F. Scherer 217 (1997) 259

Non-equilibrium thermodynamic and hydrodynamic theories
Dissipative tunneling with periodic polychromatic driving: Exact results and tractable approximations, M. Grifoni, L. Hartmann and P. Hänggi 217 (1997) 167

Ab initio schemes for stationary properties
Spin–orbit interaction in heavy group 13 atoms and TlAr, T. Leininger, A. Berning, A. Nicklass, H. Stoll, H.-J. Werner and H.-J. Flad 217 (1997) 19
Nuclear relaxation and vibrational contributions to the static electrical properties of polyatomic molecules: beyond the Hartree-Fock approximation, J.M. Luis, J. Martí, M. Duran and J.L. Andrés 217 (1997) 29
A simulation of ultrafast state-selective IR-laser-controlled isomerization of hydrogen cyanide based on global 3D ab initio potential and dipole surfaces, W. Jakubetz and B.L. Lan 217 (1997) 375

Computational and simulation methods
Theoretical study of multiple high-order harmonic generation by intense ultrashort pulsed laser fields: A new generalized pseudospectral time-dependent method, X.-M. Tong and S.-I. Chu 217 (1997) 119
Femtosecond quantum dynamics of photoassociation reactions: the exciplex formation of mercury, P. Backhaus and B. Schmidt 217 (1997) 131
Femtosecond pump-probe spectroscopy of electron-transfer systems: a nonperturbative approach, B. Wolfseder, L. Seidner, G. Stock and W. Domcke 217 (1997) 275
A time-independent wavepacket approach to the (t, t')-method for treating time-dependent Hamiltonian systems, S.C. Althorpe, D.J. Kouri, D.K. Hoffman and N. Moiseyev 217 (1997) 289
A theory of coherent control of reaction dynamics based on the optimization of a linear time-invariant system with complex variables, Y. Watanabe, H. Umeda, Y. Ohtsuki, H. Kono and Y. Fujimura 217 (1997) 317
A simulation of ultrafast state-selective IR-laser-controlled isomerization of hydrogen cyanide based on global 3D ab initio potential and dipole surfaces, W. Jakubetz and B.L. Lan 217 (1997) 375
Learning control of quantum-mechanical systems by laboratory identification of effective input–output maps, M.Q. Phan and H. Rabitz 217 (1997) 389

Molecular dynamics and scattering theory
A weak-mode representation of floppy molecules. Part IV. Spectroscopic states of model HCN and CNH, X. Chapuisat, C. Saint-Espès, C. Zuhrt and L. Zülicke 217 (1997) 43
Femtosecond quantum dynamics of photoassociation reactions: the exciplex formation of mercury, P. Backhaus and B. Schmidt 217 (1997) 131
Phase-space localization and level spacing distributions for a driven rotor with mixed regular/chaotic dynamics, T. Gorin, H.J. Korsch and B. Mirbach 217 (1997) 145
Stimulated emission processes and strong field effects in ultrashort pulse excitation of a predissociative molecule, H. Dietz, A. Materny and V. Engel 217 (1997) 249
A time-independent wavepacket approach to the (t, t')-method for treating time-dependent Hamiltonian systems, S.C. Althorpe, D.J. Kouri, D.K. Hoffman and N. Moiseyev 217 (1997) 289
Optimal pump-dump control, Y.J. Yan, J. Che and J.L. Krause 217 (1997) 297
Simultaneous control of selectivity and yield of molecular dissociation. Pulsed incoherent interference control, M. Shapiro, Z. Chen and P. Brumer 217 (1997) 325

Theory of ultrafast laser control for state-selective dynamics of diatomic molecules in the ground electronic state: vibrational excitation, dissociation, spatial squeezing and association, M.V. Korolkov, J. Manz and G.K. Paramonov 217 (1997) 341
Learning control of quantum-mechanical systems by laboratory identification of effective input–output maps, M.Q. Phan and H. Rabitz 217 (1997) 389

Experimental

Magnetic resonances

Electron paramagnetic resonance of Ni(II) doped tris(ethylenediamine)zinc(II) dinitrate, C.R. Wilson, M.J. Riley, D. Wang and G.R. Hanson 217 (1997) 63

Infrared spectroscopy

A weak-mode representation of floppy molecules. Part IV. Spectroscopic states of model HCN and CNH, X. Chapuisat, C. Saint-Espès, C. Zuhrt and L. Zülicke 217 (1997) 43

Raman spectroscopy

Raman bandshape analysis of oxocarbon ions in aqueous solutions, M.C.C. Ribeiro, L.F.C. de Oliveira and P.S. Santos 217 (1997) 71

Visible and UV spectroscopy

The phosphorescence excitation spectrum of jet-cooled 4-H-1-benzopyrane-4-thione, A.A. Ruth, F.J. O'Keeffe, R.P. Brint and M.W.D. Mansfield 217 (1997) 83

Fluorescence spectroscopy

Vibron-mediated electronic relaxation in crystalline chlorine, D. Logan, C.A. Wight and V.A. Apkarian 217 (1997) 99

Laser methods

Nonequilibrium distributions of rotational and vibrational energies in a free-jet expansion, H. Hulsman 217 (1997) 107
A theory of coherent control of reaction dynamics based on the optimization of a linear time-invariant system with complex variables, Y. Watanabe, H. Umeda, Y. Ohtsuki, H. Kono and Y. Fujimura 217 (1997) 317
A simulation of ultrafast state-selective IR-laser-controlled isomerization of hydrogen cyanide based on global 3D ab initio potential and dipole surfaces, W. Jakubetz and B.L. Lan 217 (1997) 375
Learning control of quantum-mechanical systems by laboratory identification of effective input–output maps, M.Q. Phan and H. Rabitz 217 (1997) 389

Non-linear optical spectroscopy

Nuclear relaxation and vibrational contributions to the static electrical properties of polyatomic molecules: beyond the Hartree-Fock approximation, J.M. Luis, J. Martí, M. Duran and J.L. Andrés 217 (1997) 29

Atomic and molecular beam techniques

The phosphorescence excitation spectrum of jet-cooled 4-H-1-benzopyrane-4-thione, A.A. Ruth, F.J. O'Keeffe, R.P. Brint and M.W.D. Mansfield 217 (1997) 83

Nonequilibrium distributions of rotational and vibrational energies in a free-jet expansion, H. Hulsman 217 (1997) 107

Objects

Bulk systems

Gases

Isotope effects on the rate constants for the processes $O_2 + O \rightarrow O + O_2$ and $O_2 + O + Ar \rightarrow O_3 + Ar$. On a modified ground-state potential energy surface for ozone, A. Gross and G.D. Billing 217 (1997) 1
Nonequilibrium distributions of rotational and vibrational energies in a free-jet expansion, H. Hulsman 217 (1997) 107

Supersonic beams

The phosphorescence excitation spectrum of jet-cooled 4-H-1-benzopyrane-4-thione, A.A. Ruth, F.J. O'Keeffe, R.P. Brint and M.W.D. Mansfield 217 (1997) 83

Liquid mixtures and solutions

Vibronic and vibrational coherence and relaxation dynamics of molecules in condensed phases, M. Hayashi, T.-S. Yang, A. Mebel, C.H. Chang, S.H. Lin and N.F. Scherer 217 (1997) 259

Crystals

-neat

Vibron-mediated electronic relaxation in crystalline chlorine, D. Logan, C.A. Wight and V.A. Apkarian 217 (1997) 99

Polymers

Dynamical resonance and tunneling in a driven system with periodic potential, E.M. Zanardi and J.M. Gomez Llorente 217 (1997) 221

Semiconductors

Ultracold atoms in modulated standing light waves, K. Drese and M. Holthaus 217 (1997) 201
Dynamical resonance and tunneling in a driven system with periodic potential, E.M. Zanardi and J.M. Gomez Llorente 217 (1997) 221

Microscopic systems

Atoms

Spin–orbit interaction in heavy group 13 atoms and TlAr, T. Leininger, A. Berning, A. Nicklass, H. Stoll, H.-J. Werner and H.-J. Flad 217 (1997) 19
Theoretical study of multiple high-order harmonic generation by intense ultrashort pulsed laser fields: A new generalized pseudospectral time-dependent method, X.-M. Tong and S.-I. Chu 217 (1997) 119

Molecules (neutral and ionic)
Dynamical simulation of the driven spin-boson system: The influence of interblip correlations, M. Winterstetter and U. Weiss 217 (1997) 155
Photodissociation of Ar_2^+ in strong laser fields, P. Schwendner, F. Seyl and R. Schinke 217 (1997) 233
Simultaneous control of selectivity and yield of molecular dissociation. Pulsed incoherent interference control, M. Shapiro, Z. Chen and P. Brumer 217 (1997) 325

-diatomic
Isotope effects on the rate constants for the processes $O_2 + O \rightarrow O + O_2$ and $O_2 + O + Ar \rightarrow O_3 + Ar$. On a modified ground-state potential energy surface for ozone, A. Gross and G.D. Billing 217 (1997) 1
Femtosecond quantum dynamics of photoassociation reactions: the exciplex formation of mercury, P. Backhaus and B. Schmidt 217 (1997) 131
Photodissociation of Ar_2^+ in strong laser fields, P. Schwendner, F. Seyl and R. Schinke 217 (1997) 233
Stimulated emission processes and strong field effects in ultrashort pulse excitation of a predissociative molecule, H. Dietz, A. Materny and V. Engel 217 (1997) 249
Theory of ultrafast laser control for state-selective dynamics of diatomic molecules in the ground electronic state: vibrational excitation, dissociation, spatial squeezing and association, M.V. Korolkov, J. Manz and G.K. Paramonov 217 (1997) 341

-small polyatomics
Isotope effects on the rate constants for the processes $O_2 + O \rightarrow O + O_2$ and $O_2 + O + Ar \rightarrow O_3 + Ar$. On a modified ground-state potential energy surface for ozone, A. Gross and G.D. Billing 217 (1997) 1
Nuclear relaxation and vibrational contributions to the static electrical properties of polyatomic molecules: beyond the Hartree-Fock approximation, J.M. Luis, J. Martí, M. Duran and J.L. Andrés 217 (1997) 29
A weak-mode representation of floppy molecules. Part IV. Spectroscopic states of model HCN and CNH, X. Chapuisat, C. Saint-Espès, C. Zuhrt and L. Zülicke 217 (1997) 43
Raman bandshape analysis of oxocarbon ions in aqueous solutions, M.C.C. Ribeiro, L.F.C. de Oliveira and P.S. Santos 217 (1997) 71
A theory of coherent control of reaction dynamics based on the optimization of a linear time-invariant system with complex variables, Y. Watanabe, H. Umeda, Y. Ohtsuki, H. Kono and Y. Fujimura 217 (1997) 317
A simulation of ultrafast state-selective IR-laser-controlled isomerization of hydrogen cyanide based on global 3D ab initio potential and dipole surfaces, W. Jakubetz and B.L. Lan 217 (1997) 375

-aromatics
The phosphorescence excitation spectrum of jet-cooled 4-H-1-benzopyrane-4-thione, A.A. Ruth, F.J. O'Keeffe, R.P. Brint and M.W.D. Mansfield 217 (1997) 83

-other large
Vibronic and vibrational coherence and relaxation dynamics of molecules in condensed phases, M. Hayashi, T.-S. Yang, A. Mebel, C.H. Chang, S.H. Lin and N.F. Scherer 217 (1997) 259

Molecular aggregates

-van der Waals molecules
Spin–orbit interaction in heavy group 13 atoms and TlAr, T. Leininger, A. Berning, A. Nicklass, H. Stoll, H.-J. Werner and H.-J. Flad 217 (1997) 19

Quasiparticles (including excitons)
Ultracold atoms in modulated standing light waves, K. Drese and M. Holthaus 217 (1997) 201

Defects and impurities
Electron paramagnetic resonance of Ni(II) doped tris(ethylenediamine)zinc(II) dinitrate, C.R. Wilson, M.J. Riley, D. Wang and G.R. Hanson 217 (1997) 63
Dynamical simulation of the driven spin-boson system: The influence of interblip correlations, M. Winterstetter and U. Weiss 217 (1997) 155

Phenomena

Molecular structure
Spin–orbit interaction in heavy group 13 atoms and TlAr, T. Leininger, A. Berning, A. Nicklass, H. Stoll, H.-J. Werner and H.-J. Flad 217 (1997) 19

Vibrations and rotations of molecules
A weak-mode representation of floppy molecules. Part IV. Spectroscopic states of model HCN and CNH, X. Chapuisat, C. Saint-Espès, C. Zuhrt and L. Zülicke 217 (1997) 43
The phosphorescence excitation spectrum of jet-cooled 4-H-1-benzopyrane-4-thione, A.A. Ruth, F.J. O'Keeffe, R.P. Brint and M.W.D. Mansfield 217 (1997) 83
Femtosecond quantum dynamics of photoassociation reactions: the exciplex formation of mercury, P. Backhaus and B. Schmidt 217 (1997) 131
Stimulated emission processes and strong field effects in ultrashort pulse excitation of a predissociative molecule, H. Dietz, A. Materny and V. Engel 217 (1997) 249

Electronic structure and states
Electron paramagnetic resonance of Ni(II) doped tris(ethylenediamine)zinc(II) dinitrate, C.R. Wilson, M.J. Riley, D. Wang and G.R. Hanson 217 (1997) 63

Electric and magnetic properties
Nuclear relaxation and vibrational contributions to the static electrical properties of polyatomic molecules: beyond the Hartree-Fock approximation, J.M. Luis, J. Martí, M. Duran and J.L. Andrés 217 (1997) 29
Electron paramagnetic resonance of Ni(II) doped tris(ethylenediamine)zinc(II) dinitrate, C.R. Wilson, M.J. Riley, D. Wang and G.R. Hanson 217 (1997) 63

Molecular interactions
Nonequilibrium distributions of rotational and vibrational energies in a free-jet expansion, H. Hulsman 217 (1997) 107

Coupling of electronic and nuclear motion
Stimulated emission processes and strong field effects in ultrashort pulse excitation of a predissociative molecule, H. Dietz, A. Materny and V. Engel 217 (1997) 249
Femtosecond pump-probe spectroscopy of electron-transfer systems: a nonperturbative approach, B. Wolfseder, L. Seidner, G. Stock and W. Domcke 217 (1997) 275

Energy transfer processes
Nonequilibrium distributions of rotational and vibrational energies in a free-jet expansion, H. Hulsman 217 (1997) 107

Molecular photophysical processes
Simultaneous control of selectivity and yield of molecular dissociation. Pulsed incoherent interference control, M. Shapiro, Z. Chen and P. Brumer 217 (1997) 325

Intramolecular dynamics
A weak-mode representation of floppy molecules. Part IV. Spectroscopic states of model HCN and CNH, X. Chapuisat, C. Saint-Espès, C. Zuhrt and L. Zülicke 217 (1997) 43
A theory of coherent control of reaction dynamics based on the optimization of a linear time-invariant system with complex variables, Y. Watanabe, H. Umeda, Y. Ohtsuki, H. Kono and Y. Fujimura 217 (1997) 317
A simulation of ultrafast state-selective IR-laser-controlled isomerization of hydrogen cyanide based on global 3D ab initio potential and dipole surfaces, W. Jakubetz and B.L. Lan 217 (1997) 375

-radiationless transitions
Vibron-mediated electronic relaxation in crystalline chlorine, D. Logan, C.A. Wight and V.A. Apkarian 217 (1997) 99

-vibrational energy redistribution (including vibrational dissociation)
Control of tunneling processes with an external field in a four-level system: an analytic approach, R.I. Cukier, C. Denk and M. Morillo 217 (1997) 179

Luminescence spectra, yields and lifetimes
Vibron-mediated electronic relaxation in crystalline chlorine, D. Logan, C.A. Wight and V.A. Apkarian 217 (1997) 99

Coherence loss processes
Control of tunneling processes with an external field in a four-level system: an analytic approach, R.I. Cukier, C. Denk and M. Morillo 217 (1997) 179
Vibronic and vibrational coherence and relaxation dynamics of molecules in condensed phases, M. Hayashi, T.-S. Yang, A. Mebel, C.H. Chang, S.H. Lin and N.F. Scherer 217 (1997) 259

Non-linear responses (including optical)
Nuclear relaxation and vibrational contributions to the static electrical properties of polyatomic molecules: beyond the Hartree-Fock approximation, J.M. Luis, J. Martí, M. Duran and J.L. Andrés 217 (1997) 29
Theoretical study of multiple high-order harmonic generation by intense ultrashort pulsed laser fields: A new generalized pseudospectral time-dependent method, X.-M. Tong and S.-I. Chu 217 (1997) 119

Dissipative tunneling with periodic polychromatic driving: Exact results and tractable approximations, M. Grifoni, L. Hartmann and P. Hänggi 217 (1997) 167
Photodissociation of Ar_2^+ in strong laser fields, P. Schwendner, F. Seyl and R. Schinke 217 (1997) 233

Multiphoton phenomena
Theoretical study of multiple high-order harmonic generation by intense ultrashort pulsed laser fields: A new generalized pseudospectral time-dependent method, X.-M. Tong and S.-I. Chu 217 (1997) 119
Femtosecond quantum dynamics of photoassociation reactions: the exciplex formation of mercury, P. Backhaus and B. Schmidt 217 (1997) 131
Phase-space localization and level spacing distributions for a driven rotor with mixed regular/chaotic dynamics, T. Gorin, H.J. Korsch and B. Mirbach 217 (1997) 145
Ultracold atoms in modulated standing light waves, K. Drese and M. Holthaus 217 (1997) 201
Photodissociation of Ar_2^+ in strong laser fields, P. Schwendner, F. Seyl and R. Schinke 217 (1997) 233
Optimal pump-dump control, Y.J. Yan, J. Che and J.L. Krause 217 (1997) 297
Theory of ultrafast laser control for state-selective dynamics of diatomic molecules in the ground electronic state: vibrational excitation, dissociation, spatial squeezing and association, M.V. Korolkov, J. Manz and G.K. Paramonov 217 (1997) 341

Reactions (including dissociation)
Theory of ultrafast laser control for state-selective dynamics of diatomic molecules in the ground electronic state: vibrational excitation, dissociation, spatial squeezing and association, M.V. Korolkov, J. Manz and G.K. Paramonov 217 (1997) 341

-gas phase
Isotope effects on the rate constants for the processes $O_2 + O \rightarrow O + O_2$ and $O_2 + O + Ar \rightarrow O_3 + Ar$. On a modified ground-state potential energy surface for ozone, A. Gross and G.D. Billing 217 (1997) 1
Theory of ultrafast laser control for state-selective dynamics of diatomic molecules in the ground electronic state: vibrational excitation, dissociation, spatial squeezing and association, M.V. Korolkov, J. Manz and G.K. Paramonov 217 (1997) 341

-photochemical
Optimal pump-dump control, Y.J. Yan, J. Che and J.L. Krause 217 (1997) 297

Tunnelling
Dynamical simulation of the driven spin-boson system: The influence of interblip correlations, M. Winterstetter and U. Weiss 217 (1997) 155
Dissipative tunneling with periodic polychromatic driving: Exact results and tractable approximations, M. Grifoni, L. Hartmann and P. Hänggi 217 (1997) 167
Control of tunneling processes with an external field in a four-level system: an analytic approach, R.I. Cukier, C. Denk and M. Morillo 217 (1997) 179
Dynamical resonance and tunneling in a driven system with periodic potential, E.M. Zanardi and J.M. Gomez Llorente 217 (1997) 221
A theory of coherent control of reaction dynamics based on the optimization of a linear time-invariant system with complex variables, Y. Watanabe, H. Umeda, Y. Ohtsuki, H. Kono and Y. Fujimura 217 (1997) 317

Electron transfer
Dynamical simulation of the driven spin-boson system: The influence of interblip correlations, M. Winterstetter and U. Weiss 217 (1997) 155
Dissipative tunneling with periodic polychromatic driving: Exact results and tractable approximations, M. Grifoni, L. Hartmann and P. Hänggi 217 (1997) 167
Control of tunneling processes with an external field in a four-level system: an analytic approach, R.I. Cukier, C. Denk and M. Morillo 217 (1997) 179
Dynamical resonance and tunneling in a driven system with periodic potential, E.M. Zanardi and J.M. Gomez Llorente 217 (1997) 221
Femtosecond pump-probe spectroscopy of electron-transfer systems: a nonperturbative approach, B. Wolfseder, L. Seidner, G. Stock and W. Domcke 217 (1997) 275

Molecular motion (including diffusive)
Stimulated emission processes and strong field effects in ultrashort pulse excitation of a predissociative molecule, H. Dietz, A. Materny and V. Engel 217 (1997) 249
Optimal pump-dump control, Y.J. Yan, J. Che and J.L. Krause 217 (1997) 297

Collective motion and excitations
Vibron-mediated electronic relaxation in crystalline chlorine, D. Logan, C.A. Wight and V.A. Apkarian 217 (1997) 99
